

A fresh take on tech.

Strategy. Cloud. Support. Security. Infrastructure. Collaboration. CRM. Training.

TechWise Group doesn't just make technology work. We make technology work for your business, to help you achieve more. Our services – strategy, cloud, support, security, infrastructure, collaboration, CRM, and training work together to enable your organization to be productive no matter where your users are. We empower your small business to do big things. *Experience a fresh take on tech.*

Strategy & Planning

Head in the clouds? Or firmly on the ground? Regardless of which direction you are heading in, let us work with you to develop a strategic plan for your technology. You must focus on growing your organization; let TechWise Group spearhead the plan that gets your business headed in the right direction.

Infrastructure & Networks

We take the challenge out of upgrading and maintaining older systems, and convert them to something built to grow with you. From individual desktops to company-wide solutions, whether on-premises or in the cloud, or somewhere in between, our technical experts fanatically work hard to ensure a smooth installation with minimal service interruptions, each and every time.

Support & Management

You need a solid strategy for supporting end users and proactively maintaining and managing critical systems. No matter where or how you work, our comprehensive technology support services have you covered. We offer as-needed support, bundled blocks of hours up to fully managed services for Windows, Apple, and Linux environments.

Cloud Services

Everyone is talking about the cloud. Do you want a cloud of your very own? No problem! TechWise Group has made it happen for over 200 entities with compliant solutions such as Microsoft Office 365 and Microsoft Azure. Empower your workforce with data stores and communication tools that are fully accessible 24 hours a day, seven days a week. You'll never look at clouds the same again!

[Learn More »](#)

Security & Compliance

Build a fortress around your business to protect your technology and business critical data. We can help your organization implement technologies that enhance productivity, collaboration and mobility while also providing a robust security and compliance posture.

[Learn More »](#)

Technology Training

Technology is only useful when you can use it. Get the most out of your investment by training your team. We offer training solutions to fit your needs, on-site, off-site, online or in our facilities.
